What's Restaurant Kiosk?

As a standalone kiosk in the lobby of a quick service or counter service restaurant, it can shorten wait time by providing more ordering opportunities for your customers. Customers can just make and pay their orders, then easily pickup when the orders are ready!

As a Table Side Kiosk, customers can order items right from the table and your staffs will know exactly which table ordered them and serve food out to them when it is ready. Customers no longer need to sit un-served when your staff is busy or if the customers are in a hurry.
