Cloud or installed POS?

Compare where staff take orders, where managers work and what to include in your quote.

	Aldelo Express	Aldelo POS for Windows
	 Cloud POS on T2	 Installed Windows POS
Take an order	Use a supported iPad or Android station at the counter, or take a handheld to the table.	Staff enter dine-in, takeout and delivery orders at the restaurant's Windows workstations.
Manage the store	Change menus and review sales in the cloud back office from a browser.	Manage menus and sales locally. Back up the database before updates and check how to restore it.
License the POS	U.S. stores can subscribe with their own payment provider or get Express POS software included with Aldelo Pay processing.	Choose a subscription or a perpetual license for the original business and store. Perpetual license holders buy support and updates separately.

P5L with ePay

Check payment processing before you buy

For integrated U.S. Express payments, confirm your ePay-certified processor, merchant account and reader. For Windows, have Aldelo confirm the EDC edition, processor and reader together. Ask for separate hardware, software and processing costs.

Bring your station count, service style and preferred processor.
