Promote your Masa Online Order menu

Give guests a way to order from your restaurant when they see your website, pick up dinner or sit down at a table.

Prepare your storefront

Open your restaurant's Masa link on a phone. Check the restaurant name, location, hours and pickup instructions. Open a popular dish and check its photo, price and modifiers.

Share your ordering link

Add an "Order online" button to your website. Share a dish and your store link in a social post. For a storefront QR sticker, choose "Masa+ Online Store" when linking it in Express.

Invite guests to order pickup

On your Express iPad, choose "Scan App QR" and scan an Aldelo sticker. Select "Masa+ Online Menu" for pickup. Place it on a bag insert or by the counter with "Scan to order pickup."

Set up a code for each table

In the Masa back office, enable "In-Store Table Side Ordering" under Store Info > Operations. Link a unique sticker to its table with "Masa+ Table Side Ordering" in Express.

Test each placement before printing

Scan with a guest's phone camera. Check the store and pickup menu or table number. Tap the website and social links too. Print one sample and scan it at its final size.

T2 / Express

P5L / ePay

Payments online and at the counter

Guests pay online with methods your store accepts. For U.S. in-person payments, ask about Aldelo Pay merchant services or a processor certified for ePay. The P5L accepts chip and tap with compatible processing.
